Title: METHODS OF SYNTHESIZING LABELED POLYNUCLEOTIDES BY  
LIGATION OF MULTIPLE OLIGOMERS

**DECLARATION UNDER 37 C.F.R. § 1.175, AND POWER OF ATTORNEY**

I am the named inventor on the captioned U.S. Patent No. 6,001,614, issued December 14, 1999. As the named inventor, I hereby declare that my residence, mailing address and citizenship are as stated below next to my name. I verily believe I am the original, first and sole inventor of the subject matter claimed in this application for reissue of U.S. Patent No. 6,001,614, entitled:

**METHODS OF SYNTHESIZING LABELED POLYNUCLEOTIDES BY LIGATION  
OF MULTIPLE OLIGOMERS.**

The application for reissue of U.S. Patent No. 6,001,614 comprises the attached copy of U.S. Patent No. 6,001,614, as amended by a Preliminary Amendment dated December 12, 2001. I have reviewed and understand the contents of the specification of the above-identified reissue application, including the claims, as amended by the Preliminary Amendment referred to above.

I believe the original patent to be wholly or partly inoperative by reason of the patentee claiming more or less than patentee had a right to claim.

I hereby acknowledge the following errors in the claims of the original patent, which causes the original patent to be wholly or partly inoperative. In particular, independent 1 and 23 of the patent is narrower in scope than it should be, by virtue of the definition of the oligonucleotide 5'-monophosphates as "consists of not more than 10 bases." The specification at, e.g., column 4, lines 24-25, make clear that such oligonucleotide 5'-monophosphates are defined as including "up to about 10 base length." Accordingly, this reissue application seeks to correct the error present in independent claims 1 and 23 of the patent, by amending the definition of the oligonucleotide 5'-monophosphates as "[consists of not more than] has up to about 10 bases."

Moreover, this reissue application seeks to correct an error in the original patent which occurred due to inadvertence in not claiming all embodiments which I had a right to claim. New reissue claims 24-29 are directed to embodiments wherein the new independent claims track the subject matter of independent claims 1 and 23 of the original patent, but are not limited by specific base lengths of the primer and oligonucleotide 5'-monophosphates, respectively. Instead, their lengths are defined such that the length of each of the oligonucleotide 5'-monophosphates is short relative to the length of the primer. This specific concept of differential base lengths is disclosed in the original patent at, e.g., column 11, line 41 to column 12, line 6. The newly added dependent claims recite preferred embodiments of the base lengths of the primer and oligonucleotide 5'-monophosphates, consistent with the disclosure and claims of the original patent.

All the errors which are being corrected in this reissue application up to the time of filing this declaration, arose without any deceptive intention on the part of the applicant.

I acknowledge my duty to disclose information of which I am aware and which is material to the patentability of this application as defined in 37 C.F.R. 1.56.

To the extent necessary, I hereby claim the benefit under 35 United States Code §120 of United States Patent Application No. 09/241,353, filed February 2, 1999, which issued as U.S. Patent No. 6,001,614 for which reissue is now sought.

I hereby appoint Richard S. Handley, Ph.D., Reg. No. 38,484, as my attorney or agent to prosecute this reissue application and to transact all business in the Patent and Trademark Office connected therewith, and request that all correspondence about the application be addressed to:
